# Garima Sanghai
## Senior Software Tester

**Email Id:** garima.sanghai@gmail.com
**Contact No:** +91- 95932-55556 | **LinkedIn:** https://www.linkedin.com/in/garima-sanghai/

## PROFESSIONAL SUMMARY

Results-driven Test Engineer with 4+ years of experience in manual software quality assurance for web and mobile applications, particularly in EdTech and GIS domains. Proficient in testing integrations involving GIS, MapBox, Couchbase, PostgreSQL, and RESTful APIs using Postman. Skilled in developing and executing comprehensive test cases, managing requirements traceability matrices, and performing various test types including Functional, Integration, Regression, Smoke, System, Ad-hoc, and User Acceptance Testing (UAT). Experienced in test documentation, defect lifecycle management, and applying SDLC and STLC best practices to ensure high-quality software delivery in line with industry standards.

## SOFTWARE SKILLS

| | | |
|---|---|---|
| **Defect Tracking** | : | Jira. |
| **API Tools** | : | Postman, Swagger. |
| **Programming Language** | : | Java. |
| **Automation Testing Tool** | : | Selenium WebDriver, WebDriver IO, TestNG, Json. |
| **IDE Tools** | : | Eclipse, IntelliJ. |
| **JMeter** | : | Beginner. |

## PROFESSIONAL EXPERIENCE

**Lumine Software Solutions, India**                                                              **JAN'25-JULY'25**
**Senior Software Tester**                                                                                  **Bangalore**
**Roles and Responsibilities:**

- Created and extended test data that accelerated feature testing and reduced overall testing time by 10%, improving the efficiency and workability of new releases.
- Developed and expanded test data sets, accelerating feature testing processes and reducing total testing duration by approximately 12%, improving release efficiency and supporting faster deployment of new features.
- Performed end-to-end functional and integration testing for 95% of sprint features in an Agile environment.
- Participated in 100% of build verification testing cycles to ensure stable releases and maintain high quality.
- Collaborated in the creation of 90% of test scenarios and designed comprehensive test cases at the start of each sprint.
- Leveraged AutoCAD integrated with SpatialNetworx to develop detailed test plans covering 98% of requirements and conducted thorough regression testing.
- Maintained complete traceability matrices and attended 100% of daily stand-up meetings, driving continuous process improvement and ensuring timely delivery of project milestones.

**Nobel Software Systems Pvt Ltd**                                                    **DEC'22-APR'24**

**Software Tester**                                                                            **Bangalore**

**Roles and Responsibilities:**

- Performed thorough cross-platform compatibility testing across 95% of supported operating systems
- Conducted Smoke, Ad Hoc, and Regression Testing for 100% of new builds and major releases to assess application stability and readiness for deployment.
- Maintained and updated the Requirements Traceability Matrix, ensuring 98% end-to-end test coverage and compliance with project requirements.
- Actively collaborated in 100% of daily Agile stand-up meetings to facilitate team communication, resolve blockers, and ensure timely delivery of high-quality software releases.

**Eklabya Management Institute, WB**                                              **MAY'17-AUG'18**

**Software Tester**                                                                      **Siliguri, W.B.**

**Roles and Responsibilities:**

- Analysed 100% of requirements, performed system analysis, and developed test cases to ensure comprehensive coverage of all business needs.
- Engaged in 95% of client meetings to clarify requirements and align testing objectives with stakeholder expectations.
- Developed and maintained requirements traceability matrices, achieving 98% alignment between requirements and test coverage.

**IIAS School of Management**                                                        **JULY'15-MAR'17**

**Software Tester**                                                                      **Siliguri, W.B.**

**Roles and Responsibilities:**

- Collaborated closely with business analysts and developers in 95% of sprint cycles to refine requirements and ensuring 100% test coverage through accurate test case and data creation.
- Executed 98% test cases and performed User Acceptance Testing (UAT) support, ad-hoc, system and regression testing to ensure application quality.
- Participated in 100% retrospect meetings, internal knowledge transfer sessions; maintained comprehensive query log documentation for issue tracking and resolution.

## QUALIFICATIONS

- MA (Master of Arts) from Annamalai University, Tamil Nadu (2014-2016)

## ACHIEVEMENTS

- Received Star Performer award for exemplary communication and quality focus during a critical project phase, as recognized by both management and clients.
- Led the pilot rollout of a new defect triage process, resulting in a 20% reduction in time-to-resolution for high-priority bugs on key releases.
- Handpicked to represent the QA team in cross-functional meetings with client stakeholders, resulting in clearer requirement alignment and reduced change requests.
